GREEN AND SUSTAINABLE PITCH BOOK

SFA GREEN AND SUSTAINABLE FINTECH MEMBERS

PITCH BOOK

SFA is driving efforts at showcasing our members' solutions to other industries, enterprises/SMEs and other industry bodies and relevant agencies.

This is in line with our mission to:

- (i) increase our members' chances of success, and
- (ii) uplift our industry, and FinTechs in the Singapore ecosystem.

[Open to SFA Green and Sustainable Fintech Solutions / Providers]

-Blockchain Worx Pte Ltd-

IMPACT  LEDGER	Pitch
<u>Company Details</u>	<p>As the drive to curb global warming gathers pace, scaling the voluntary Carbon Markets have become increasingly fundamental to achieving net zero greenhouse gas emissions. Impact Ledger delivers next-generation infrastructure for decentralized Carbon Markets. Operating at the junction of Blockchain technology, Digital Assets, and Socio-environmental Impact, the project harnesses modern decentralized finance (DeFi) approaches and Web3 technology to democratize participation, enables the structuring of all-new innovative climate finance products, and opens a plethora of opportunities to effectively channel capital towards combating climate change.</p> <p>Problem/Opportunity and Solution/Product</p> <p>Climate change is a global coordination problem and Web3 and Blockchain technology can play a pivotal role in boosting climate action by solving many of the underlying challenges of the voluntary carbon market. These include helping mobilize the entire potential supply, increasing transparency and liquidity, and aligning diverse stakeholders via a unifying market platform.</p> <p>While Carbon markets are largely decentralized (credits are generated in one region, traded in another, and potentially retired in an altogether different one), most Carbon market platforms today (traditional as well as newer Blockchain-based solutions) are still centralized. They simply won't scale.</p> <p>Impact Ledger is a Web3-powered decentralized Carbon Finance platform designed to accelerate efforts towards net zero emissions. The platform harnesses open protocols and DApps, to aggregate on-chain carbon credits, craft novel structured products, and create institutional-grade decentralized Carbon Markets ecosystem on the Blockchain.</p> <p>Zero Trust security, mpc/multi-sig wallets, and integration with select existing financial systems provides a secure and compliant way for institutions and individuals to directly participate in this all-new medium of carbon finance.</p> <p>The business model includes collaboration with licensed organizations in multiple progressive jurisdictions to create and offer Carbon-based financial products, democratize participation in Carbon Markets, and effectively channel capital towards addressing the most existential threat of our time.</p>

-DBS Bank-

	Pitch DBS is a leading financial services group in Asia with a presence in 19 markets and headquartered and listed in Singapore. Recognised for its global leadership, DBS has been named "World's Best Bank" by Global Finance, "World's Best Bank" by Euromoney and "Global Bank of the Year" by The Banker.
<u>Company Details</u>	
Green and Sustainable Fintech Solutions Category Carbon footprint calculation, Carbon offsetting, sustainable financing products and solutions	The bank is at the forefront of leveraging digital technology to shape the future of banking, having been named "World's Best Digital Bank" by Euromoney and the world's "Most Innovative in Digital Banking" by The Banker. In addition, DBS has been accorded the "Safest Bank in Asia" award by Global Finance for 14 consecutive years from 2009 to 2022. Problem/Opportunity and Solution/Product In our 2021 DBS Consumer Sustainability Survey, 73% of Singaporeans indicated they would adopt greener lifestyles <u>only</u> if it was convenient for them. As everyone has a role to play in building a better world, it is important for consumers to have an accessible and convenient platform to take action and adopt sustainable habits in their daily lives. Living sustainably doesn't have to be inconvenient. DBS LiveBetter is a one-stop digital platform for sustainability that empowers our users to Live more, Carbon less. A first of its kind in the industry, LiveBetter is integrated with DBS' digibank application to make it easier and more rewarding for our users to take sustainable actions towards more conscious living. Key features of DBS LiveBetter include:
Business Model Banking and Finance B2B2C, B2C	1. Track Better: Using the bank's proprietary carbon calculator, which was specially designed for Singapore, users can track their estimated carbon footprint based on their DBS/POSB debit and credit card transactions.
Website DBS LiveBetter DBS Singapore	2. Offset Better: After tracking their carbon footprint, users have the option to offset it right from their mobile phone by participating in a curated portfolio of carbon projects focused on reducing GHG emissions. 3. Give Better: A platform to discover and support local organisations that make a positive impact to our environment and community. The donation process takes less than five seconds, and 100% of funds raised go towards the organisations.
Contact Person Bidyut Dumra	4. Invest Better: Empowering users to learn more about sustainable investing and be a force of good by investing in ESG funds.
Business Email bidyutdumra@db.com	5. Drive Better: Accelerating an electric future with DBS' Green Car Loan.
Business Phone Number +65 91871544	6. Spend Better: Users can save money while going green by earning extra Green Cashback on selected Eco-Eateries, Retailers and Transport Services with <u>DBS Live Fresh Card</u> , Singapore's first eco-friendly credit card that's made from 85.5% recycled plastic. Users can also spend with <u>social enterprises</u> to support them in championing sustainable causes.
Founded 1968	7. Renovate Better: Enabling sustainable homes with <u>Green Renovation Loans</u> .
SFA-Fintech Certified? No	8. Power Better: Convenient access to green electricity providers via <u>Home and Living Marketplace</u> for users to enjoy savings while reducing their carbon footprint.

-GreenArc-

	<p>Pitch</p> <p>GreenArc is an award-winning impact investment and analytics fintech with an impact management technology solution: <i>impactGINI</i>. An industry-first impact measurement API offering impact measurement and reporting for debt investments, such as loans, bonds and credit markets. The solution is region agnostic and helps financial institutions across the globe transition, develop and deploy financial products towards sustainable development by measuring and maximizing the impact of their investments towards closing the UN SDG financing gap.</p>
<p>Company Details</p>	
<p>Green and Sustainable Fintech Category</p> <p>AI-driven impact investment and analytics fintech</p> <p>Impact measurement, data analytics & reporting through an industry accredited impact framework, SaaS solution that focuses on debt markets</p>	<p>A big data solution, <i>impactGINI</i> goes further than traditional ESG risk analysis by leveraging the use of technology and data and combining it with the contextual nature of sustainability to drive more robust impact analysis through AI driven tools. Aligned with global industry standards, including the UN SDGs, the framework consists of a systematic process that measures and manages the expected impact of investments by calculating a proprietary developed impact score with impact analytics, providing a perspective for comparison and consistency across sectors and geographies, bringing standardisation to impact measurement.</p>
<p>Business Model</p> <p>B2B</p>	
<p>Website</p> <p>www.greenarccapital.com</p>	<p>Problem/Opportunity and Solution/Product</p> <p>With US\$3trn invested for impact in 2020 and a market growth of 42%, the expected rise in demand for impact assets resulting from the irreversible shift of economic power to the more socially conscious population comprising millennials and females means that measuring and reporting impact is no longer a nice to have but a moral, regulatory and investor requirement across all sectors and regions. In addition, in an era of increasing greenwashing claims, skeptics are quick to disparage the sector of credibility, leading to questions about the validity and value of sustainable investing.</p> <p>Crucially, what is missing is the need for a robust impact measurement system comprising of the tools required to assess and report the impact of investments to assure investors and asset allocators they are achieving the stated impact objectives, and not contributing to greater greenwashing. GreenArc's <i>impactGINI</i> quantifies the potential impact associated with investments, providing granular level and transparent impact analysis on an end beneficiary level, displayed on an integrated digital dashboard using a data driven process to ensure investors are aligned with and meeting their stated sustainability objectives.</p>

-Greenfi (Climateforce Pte Ltd)-

	<p>Pitch Greenfi offers predictive analytics dashboards for ESG Financing based on Machine learning and AI models.</p>
<p><u>Company Details</u></p>	
<p>Green and Sustainable Fintech Category ESG Analytics, Climate Risk Dashboards</p>	<p>Problem / Opportunity Banks, Financial Institutions and Corporates are raising the issuance of green financing and ESG-linked loans but struggle with complex unstructured ESG data, weak ESG indicators and unreliable scoring systems which makes them susceptible to greenwashing. Most institutions rely on a cumbersome ESG data management and validation process to make critical business decisions</p>
<p>Business Model B2B</p>	<p>Solution / Product Greenfi's product is a SaaS based climate and ESG risk software which aggregates sustainability data from disclosures, sectoral ESG data platforms, public data, and combines it with audit and AI powered predictive recommendations for ESG-compliant investment opportunities, climate adjusted discounts, sustainability linked loans, green financing, and sustainable supplier management.</p>
<p>Website https://greenfi.co</p>	<p>An explainable AI analytics tool with pre-built machine learning models for ESG decision intelligence. This no-code utility platform helps banks to ingest any type of siloed info coming from point solutions such as credentials, ERQ & ESG reports, news, regulatory info, climate risk, KPI performance etc. and get derived insights on relevant decision making mapped with user journey of various departments for ESG financing.</p>
<p>Contact Person Barun Chandran</p>	
<p>Business Email barun@greenfi.co</p>	
<p>Business Phone Number 84449824</p>	
<p>Founded 2021</p>	<p>Business Model Greenfi's model is a SaaS subscription-based model with tiers based on usage (transactions, counterparties, data) or a consumption-based model for access to API only.</p>
<p>SFA-Fintech Certified? Yes</p>	<p>At Greenfi, we are launching several new products that will break down the barriers to accessing ESG data and tools. Several FI's rolled out Greenfi in 12 countries. The tool has contributed to reducing greenwashing risk and led to a significant increase in sustainability finance origination pipeline.</p>

-GreenFin Tech Pte Ltd-

	<p>Pitch</p> <p>GreenFin Tech Pte Ltd is a Singapore registered startup that is building an eco-system to enable green finance for sustainable projects. Greenwashing is becoming commonplace and it has become difficult for the finance industry to search for credible green projects that help meet UN SDG goals.</p>
<p><u>Company Details</u></p>	
<p>Green and Sustainable Fintech Category</p> <p>Development of Green Finance Network (GFN) eco-system</p>	<p>GFN or Green Finance Network is designed to bring together the key ESG players in the green finance industry and create an eco-system where lenders and investors can safely fund green projects developed by startups or by existing companies, both large and small.</p>
<p>Business Model</p> <p>B2B</p>	<p>GFN consists of a marketplace where curated green projects are available for lenders and investors to fund. GFN ensures that the projects are carefully curated based on industry ESG data analytics together with expert insights to give a high degree of ESG assurance.</p>
<p>Website</p> <p>Under Construction</p>	
<p>Contact Person</p> <p>Rajiv Madane</p>	<p>Problem/Opportunity and Solution/Product</p> <p>Many a times lenders and investors find that they have provided funding to ESG projects based on current financial evaluation criteria. After the projects are commissioned and the true impact of such projects on the environment are evaluated, it becomes evident that it was a greenwashing project.</p>
<p>Business Email</p> <p>rajiv@greenfintech.sg</p>	<p>Not only does the company involved in the greenwashing project gets bad publicity, but also the financing institution who's reputation risk increases dramatically. This after the event situation is irreversible.</p>
<p>Business Phone Number</p> <p>96472460</p>	
<p>Founded</p> <p>2021</p>	<p>Green Finance Network (GFN) has been designed to prevent such after the fact damage from happening. GFN helps in identifying ESG projects that are carefully curated, based on ESG evaluation criteria, and before they are funded. This helps lenders and investors carefully select those projects that are truly green in nature.</p>
<p>SFA-Fintech Certified?</p> <p>No</p>	
<p>Other information (provide URL if any)</p> <p>SFA Corporate member</p>	<p>GFN Project module allows ESG startups and companies to provide details of ESG projects to be funded. Then the data analysis and expert module evaluates these projects and provides a comprehensive analysis on each ESG project. This is reviewed by an expert panel which evaluates such projects to ensure the projects conform to industry level ESG acceptance criteria as well as UN SDG goals. The Funding module enables lenders and investors to see the results for each project and make a decision whether to fund a particular project or not.</p>

Green and Sustainable Fintech Category ESG Reporting, ESG Monitoring, RegTech	Problem/Opportunity and Solution/Product <ul style="list-style-type: none"> Modulable reporting universe. Users define their reporting universe based on major reporting standards (including TCFD, SFDR, SASB, SGX). Once defined, the platform provides a single source of truth from which all reports can automatically be generated – effectively eliminating all input redundancies. Collaboration. Users can request or share data via secure links, from internal and external business counterparts. Data can also be directly retrieved from sensors, or leading data providers. Assurance. External stakeholders such as consultants are granted access to execute on-platform reviewing, auditing, certifications, and more. Workflows is a process management application complementing U-Reg's ESG reporting application. Users define custom workflows in minutes, easily assign tasks to team members, and track progress of the organization's on-going ESG reporting. Users are guided through the platform's applications to execute tasks at the right time and place.

<u>Company Details</u>	
Sustainability Category Innovation Programmes for SMEs + GreenTech Accelerator	
Business Model B2B	
Website www.thefinlab.com	Pitch <p>The FinLab is UOB's innovation accelerator that brings the ecosystem together to catalyse business growth and transformation. With a regional presence in Singapore, Malaysia and Thailand, The FinLab provides access to a range of business and technology experts, tools and content through The FinLab Online and in-person programmes. These programmes range from supporting the FinTech and start-up community in developing solutions, to assisting the Small and Medium-sized Enterprises (SME) community in going digital and innovating for sustainability. Founded in 2015, The FinLab has supported and connected with more than 20,000 businesses globally.</p>
Contact Person Will Leong	
Business Email Will.leong@uobgroup.com	<p>The Finlab has 2 key sustainability programmes that is focused to support the SMEs and tech solution providers.</p> <p><u>Sustainability Innovation Programme (SIP)</u></p> <p>Launched in 2021, SIP is a 2-week programme to help SMEs transform their companies into sustainable and green businesses. It provides deep insights across a variety of sustainability topics such as energy efficiency, sustainable finance, renewable energy certificates (RECs), sustainable packaging, and carbon management and ESG reporting. The programme educates businesses on how sustainability can play a part in their business to balance impact while ensuring profit and productivity.</p>
