## FinTech Self-Assessment Checklist for Financial Institution Partnerships

## Introduction:

As partnerships between FinTechs and traditional financial institutions play an increasingly important role in driving innovation and compliance, it is important for FinTechs to ensure they meet key regulatory, operational, and strategic requirements.

This self-assessment checklist is designed to help FinTechs evaluate their readiness to engage and collaborate with banks and other financial institutions. It offers a structured approach to identifying areas of strength, addressing potential gaps, and preparing for effective partnerships.

By using this tool, FinTechs can better understand their alignment with industry standards and position themselves for integration into the broader financial ecosystem.

Question	Yes	No
Company Profile		
Do you have a company size of at least 20 employees?		
Has your company been in operation for at least 3 years?		
Do you have measures to mitigate against keyman risk?		
Do you have a presence in Singapore?		
Does your founder have at least 10 years of relevant		
experience in the financial services or technology sector?		
Business Model and Value Proposition		
Are you clear about your target beneficiaries/users?		
Are you able to articulate the problem statement/use cases		
that your solution/product addresses?		
Are you able to articulate the unique selling proposition of your		
solution/product?		
Can your solution scale to meet the demands of large		
financial institutions?		
Is your costing model competitive compared to market rates?		
Do you have at least 1 bank/ FI/ large company as a client?		
Is your solution scalable in at least 2 countries, taking into		
consideration local regulations and data requirements in other		
countries?		
Regulatory Compliance		
Do you have a compliance team?		
Are you compliant with all of the following financial regulations	•	
or guidelines (if applicable)?	, 🗖	
Anti-Money Laundering (AML)/ Counter-Terrorism		
Financing (CFT)		<b>N</b>
<ul> <li>Know Your Customer (KYC)</li> </ul>		
<ul> <li>Personal Data Protection Act (PDPA)</li> </ul>		
Have you obtained the following licenses, registrations or		
certifications (if applicable)?		
Outsourced Service Provider Audit Report (OSPAR)		
<ul> <li>ISO 27001</li> </ul>		
<ul> <li>ISO 27001</li> <li>ISO 20022</li> </ul>		
<ul> <li>PSD2</li> </ul>		
PCI DSS		
Do you have a data retention policy that is compliant with		
local regulations?		
Do you have zero data breach cases in the last 2 years?		
Do you have zero AML breach cases in the last 3 years?		
Do you have zero adverse news or on-going litigation?		
Security and Risk Management		
Are you familiar with the Technology Risk Management (TRM)		
guidelines?		
Is your data securely backed up with incorporated		
redundancies?		
Do you have a comprehensive cybersecurity strategy,		
including regular vulnerability assessments and penetration		
testing?		

Does your solution have high security standards with features		
such as encryption/ multi-factor authentication and regular		
security audits?		
Have you implemented strong encryption methods for sensitive		
data at rest and in transit, adhering to industry standards and		
regulations?		
Do you support standard login options such as OAuth 2.0,		
OpenID Connect, SAML?		
In terms of user ID management, do you support single sign-on		
and/or dedicated ID?		
Do you regularly conduct incident response and disaster		
recovery simulations?		
Do you have measures to mitigate the risks that your		
solution/product poses to your clients?		
Are all components of your solution/ product reviewed on a		
regular basis and monitored in real-time?		
Financial Stability		
Do you have a runway of at least 18 months of funding and		
assets/capital to sustain operations?		
Are you at post-revenue stage?		
Do you have a strong cap table or strategic/reputable		
investor(s)?		
Are your financial statements regularly audited and up to		
date?
